Driving license (B)

PROJECTS

All my projects and more details are available on my portfolio: www.valentin-gindre.fr/projects

JUNE 2025 - PRESENT

PURSTREAM

Improvement and evolution of a streaming platform already in production, used by more than 25,000 users. Work on the user interface (authentication, video player, back office) with strong requirements in maintainability, reliability, and understanding of an existing codebase. Contribution to improving usability and user experience in a real application context.

Technologies : React, TailwindCSS, Laravel

NOVEMBER - DECEMBER 2025

REAL WRAPPED

Design and development of a complete web application using Nuxt, including both front-end and integrated back-end logic. Implementation of dynamic interfaces for displaying user statistics, clear project structure, and strong attention to user experience and performance.

Technologies : Nuxt (Vuejs), PrimeVue, TailwindCSS

OCTOBER 2025

MY HABITS

Development of a web application for habit tracking, with a clear, responsive interface designed for daily use. Focus on component structuring, code readability, and overall application ergonomics, following an evolving application-oriented approach.

Technologies : Nuxt (Vuejs), PrimeVue, TailwindCSS, Laravel

EMPLOYMENT

JULY 2023 - PRESENT

FREELANCE FRONT-END DEVELOPER

Development and maintenance of websites and web applications for various clients, handling the entire front-end scope from UI implementation to performance optimization. Direct collaboration with clients to understand their needs, translate them into effective solutions, and ensure consistent, maintainable front-end choices, with occasional back-end interventions to guarantee functional coherence.

Technologies : Nuxt, Vue, TailwindCSS, React, Laravel...

AUGUST 2024 - AUGUST 2026

FULL-STACK DEVELOPER AT ATOLCD

Development of numerous features on electronic document management applications. Participation in front-end and back-end development, bug fixing, continuous integration, and team code reviews. Use of ticketing tools and rigorous validation workflows.

Technologies : Angular, Material, Java, Gerrit, Jenkins

ABOUT

Front-end developer specialized in Vue.js / Nuxt.js, I design business-oriented, user-centered web interfaces. As a freelancer, I work directly with clients to understand their challenges, define requirements, and ensure smooth collaboration with back-end developers. I place great importance on communication quality, functional clarity, and the reliability of delivered solutions. Curious and detail-oriented, I rely on a variety of freelance and professional projects to build modern, high-performance, and maintainable applications.

DEGREES

BUT IN COMPUTER SCIENCE

IUT Dijon — 3rd year in progress

September 2023 — August 2026

GENERAL BACCALAUREATE

Lycée Jacques Duhamel, Dole

Specializations: Mathematics and Computer Science (NSI)

Graduated with honors

September 2021 — July 2023

EXPERTISE

With several years of experience in front-end development on freelance and professional projects, I design maintainable, business-oriented Vue.js interfaces, paying particular attention to UI/UX, code quality, front-end best practices, and the integration of testing within real-world application contexts.

SKILLS

VUE, NUXT, PINIA (ex-Vuex), VITEST

REACT, ANGULAR, TAILWINDCSS, SCSS

HTML, CSS, JAVASCRIPT

LARAVEL, SQL, JAVA, DOCKER

FIGMA, DESIGN UI/UX

GIT, GITHUB, GERRIT

LANGUAGES

ENGLISH: B2 — Very good spoken and written comprehension, strong writing and conversational skills

SPANISH: B1 — Good spoken and written comprehension, writing and conversational skills
